

Lyons Fire Protection District

June 11, 2015

Mr. Hagan,

This letter is presented to Solar Glass in recognition of the support given by your company. As you well know during the month of May 2015 we sent four of our valued members to a two week technical rescue course in Littleton. Our goal in sending our members to this course was to gain knowledge that could be taught throughout our department.

As the rescue coordinator Jon Stambaugh was selected to attend this course. He and the other three members will be tasked with training our department, acquiring and maintaining equipment as well as assuring all of our rescues are performed as safely as possible. This is a tremendous value to our community.

We realize the strain that can come from employees being absent for extended periods. It is because of companies like yours that allows us to grow and provide better service and protection to our community. The Lyons Fire Protection District thanks you and your employees for making this possible.

If you have any questions, please feel free to give me a call,

Sincerely,

J.J. Hoffman
Fire Chief
